Journal of the Japan Society of Colour Material

(SHIKIZAI KYOKAISHI)

Vol. 86, No. 4, APR., 2013

Contents

Original Research Paper;

– Proportionality between Storage Modulus and Crosslink Density –
......................................................................................................................... Kanji Mori --- 123

Digest;

Evaluation of the Non-DLVO Force Acting on the Oxide Surface
......................................................................................................................... Toshihiro Isobe --- 128

Review;

< Colour Material Renaissance >
Film Forming Technology for the Colour Material Industry over the Past 85 Years

85 Years of Advances in Anti-Corrosive Coatings and Prospects for the Future
......................................................................................................................... Masanori Nagai --- 133

Serial Lecture;

Scanning Electron Microscope
......................................................................................................................... Atsushi Miyaki --- 139

The Methods for the Examination of Dispersibility of Colloidal Dispersions
......................................................................................................................... Masataka Ozaki --- 145
